## INTERNSHIP EXPERIENCE

BLOSTEM

Product Designer Remote | Sept 2023 - Oct 2023

★★★★★

- Designed the user flow for Blostem's official app, enhancing the overall user experience and improving user engagement.
- Contributed to the team's success by creating intuitive user flows for Blostem's official app, resulting in increased user satisfaction and product adoption.

SWAT ALLIANCE

Freelance Designer Remote | May 2023 - June 2023

★★★★★

- As a freelance professional, developed impactful client presentations and designed creative brochures to effectively promote products and communicate complex concepts, achieving successful outcomes.

VYUNEX

Design Intern Remote | Sept 2022 to April 2023

★★★★★

- Led user-centric research to improve the Learning Management System (LMS) Application, resulting in a more intuitive and engaging platform for students and educators.
- Collaborated with cross-functional teams to create visually captivating interface designs and implemented data-driven insights to boost user satisfaction and adoption rates of the LMS Application.

OTOMATOR TECHNOLOGIES

UI Designer Remote | July 2022 to August 2022

★★★★★

- Orchestrated workflow design for a student card-based application, integrating GPS technology for seamless parent-child tracking and introduced a currency system for midday meal purchases.
- Collaborated with development teams to create visually stunning and user-friendly interfaces, delivering a seamless user experience highly praised by stakeholders and end-users.

# ACADEMIC PROJECTS

## SMART BANK

★★★★★

- Created a fintech application with a robust design foundation, offering comprehensive Screens, Components, Style Guide, Brand Guidelines, and Wireframes to streamline the development process and maintain brand consistency.

## ALL-POKER LANDING WEBSITE DESIGN

★★★★★

- Designed an engaging and user-friendly landing page for an online poker platform, resulting in a significant increase in user conversions. Collaborated closely with stakeholders to understand the target audience and project requirements, and applied UI/UX design principles to create a visually appealing and intuitive interface.

## IMAGE DATA ANALYTICS FOR CLOTHING CLASSIFICATION

★★★★★

- The objective of this project is to develop a robust and scalable system that can automatically categorize clothing items based on their visual features. The proposed solution leverages the power of deep learning and convolutional neural networks(CNNs) to extract relevant features from clothing images and make accurate predictions.

# ACHIEVEMENTS

- Achieved a position among the top three finalists out of 3,250 teams in the Police Hackathon, showcasing exceptional problem-solving and innovative thinking abilities in developing solutions for law enforcement challenges for the Karnataka State Police.
- Secured victory in my debut Hackathon by developing a successful Android app, demonstrating a strong aptitude for coding, teamwork, and delivering impactful solutions within a competitive environment.
- Designed an impressive logo for the Incubation Centre of my college, showcasing creativity, graphic design skills, and an understanding of brand identity, which effectively represented the vision and values of the center.
- Accomplished IEEE Volunteer with a proven track record of hosting impactful technical talks and organizing successful events, fostering knowledge sharing and community growth.
