CHAPTER ONE

About Me

ABOUT ME

What I Do

PRODUCT DESIGNER

I specialize in creating user-centered designs that solve problems and improve the user experience. With a background in both design and engineering, I have the skills to bring ideas to life from concept to production. I am skilled in collaborating with cross-functional teams to bring products to market.

UX DESIGNER

I am a UX Designer with a passion for creating intuitive and visually stunning digital experiences. With a strong understanding of user research and design principles, I am dedicated to crafting designs that not only look great but also enhance the overall user experience.

WEB MASTER @ IEEE PESCE

I have experience working with a diverse range of individuals and teams, and I am committed to fostering an inclusive and collaborative environment where everyone can thrive. I am committed to delivering high-quality work and helping others achieve their goals.

CHAPTER TWO

My Philosophy

My Philosophy

Nothing great was ever achieved without enthusiasm

When tasked with a challenge I go deep into the problem so I can understand the core problem we're trying to solve. Knowing this helps me make informed decisions and build enthusiasm for creating the best experience.

Clear experiences over unpredictability

As designers, our goal is not to eliminate complexity or friction, but rather create a clear, intuitive and understandable product experience. At times, this may mean adding thoughtful complexity.

We must constantly challenge our own assumptions

It's easy to become over confident in our ideas and opinions. Rigorous iteration and testing can help bring clarity and confidence to the work.
